

Prescribing Health Care Professional, Flight Attendants are safety professionals.

Below is a roster of a Flight Attendant's essential job functions.

Please consider and discuss these functions with your Flight Attendant patient prior to prescribing medications.

- Ensure the safety of passengers
- Operate all emergency equipment, including doors/slides
- Safely evacuate full aircraft in 90 seconds or less
- Administer first aid and CPR, assist medical providers
- Frequent balancing, standing & walking
- Remain vigilant at all times for security threats

Present this card to your health care professional to determine if you can use a medication and safely perform your Flight Attendant duties
